

The Multi Lifter

Packline Multi lifters enable users to repeatedly lift and accurately place a wide variety of loads including paper and plastic sacks, boxes, crates and cartons

An electrically driven hoist provides the lifting with a range of quickly interchangeable lifting heads is available

The Packline Multi Lifter has a 360 degree rotation covering a large footprint of working area

The lifting heads have a 'solo grip' control bar so the operator uses minimum effort to move heavy loads

The machines can be specified in stainless steel for use in the pharmaceutical and food industries.

Multi Lift
