

Trucks And Solutions For Explosive Atmospheres

Dangerous explosive atmospheres - the explosion proof truck and ATEX Drum Handling Equipment are developed in areas in which an explosive atmosphere is generated occasionally due to gasses or dust.

The design focuses on the safety and ergonomic working conditions of the user - the ergonomically correct shape handle ensures a relaxed hold for the user to operate the steer truck and teh drum lifter.

High quality is ensured through an extended test programme and in cooperation with experts in the ATEX and Health and Safety fields.

These systems can be modified to accomodate Packline's wide range of lifting and handling attachments and still maintain the ATEX rating.

Please do not hesitate to contact Packline for further information regarding this design on 01202 307700 or via our web site at www.packline.co.uk

Explosion Proof Manual Stacker (Above)

Great Durability

- Strong construction
- Long operating life
- Low maintenance costs

Facts

- Manufactured in accordance with directive no. 94/9/EC (ATEX 100a) and EN-1755.
- Categorised in equipment group II
- Suitable for areas categorised as zone 1
- Suitable for the pharmaceutical industry and the oil, gas and paint industry.
- One anti-static wheel of Vulkollan.
