

Forklift Drum Carriers (Parrot Beak)

All units are issued with Test Certificates, CE Marking and are manufactured to ISO 9001:2008 Standard, ensuring the highest quality.

Attachment slides onto the forks of the truck. Specifications of the truck and the forks will be required to ensure the design is made to fit the individual forklift. Double carriers are also available as shown below.

The drum carrier can also be extended, therefore allowing it to reach beyond the legs of the truck. Drums can be stacked on platforms etc in this way. Counterbalance can be added to increase the Safe Working Load (SWL).

All units have a quick release system for removing the attachment and allowing other attachments to be used with the same truck.

Please do not hesitate to contact Packline for further information regarding this design on 01202 307700 or via our web site at www.packline.co.uk
