

Euro Bin Cradle Attachment - Stainless Steel

This Stainless Steel Heavy Duty Stacked Truck is fitted with a Cradle Attachment specifically design to lift standard Euro Bins as seen in the below image. These bins often need lifting to height allowing for the contents to be more easily emptied. They may also need stacking or storing at height.

Euro Bins are used widely in the Food Industry to store and move ingredients or finished product around and therefore this solution is a fantastic simple solution for this application.

The particular stacker truck used in this example has electric lift and manual propulsion and is made of a stainless steel construction. However mild steel painted, manual and fully powered versions are available. Lift heights can go up to 3mtrs if required.

Custom designs can be built to handle up to 1000kg and we work with you through the complete design process to ensure that you have the correct solution for your needs.

Our design facility equipped with the latest 3D CAD system and our workshops with the latest CNC manufacturing technology enables cost effective custom solutions to be provided in short lead times.

Every design is fully tested, CE marked, supported by a detailed technical file meeting the latest legislation and Health & Safety directives.

Please do not hesitate to contact Packline for further information regarding this design on 01202 307700 or via our web site at www.packline.co.uk
