

# Rotating Hopper Attachment

---

The Rotating Hopper attachment has been designed to provide optimum flexibility with the handling of a wide range of bulk materials.

This attachment has been designed and manufactured specifically to handle blocks of salt and it is entirely suitable for the food industry and other hygienic applications.

It is also fitted with a manual gearbox which has a handwheel for the quick and simple rotation of the hopper to and from the horizontal (loading) position through to a vertical (unloading) position.

In addition, the machine also has a push button operated powered drive such that the hopper can be swiftly elevated or lowered to a required height.

Like all Packline attachments, it is backed up by a full bespoke engineering design service so ensuring that the right solution can be made to suit most requirements.

All Packline attachments are fully interchangeable and can be easily fitted or removed from any model of Compac lifting machine that is fitted with the attachment quick release system.

- 60kg maximum capacity.
