

Pneumatic Pallet Dispenser - LP14E/F T14

Pallet Dispensers are fast becoming a key element for improving working conditions in a warehouse environment.

The risk of ergonomic problems with pallet handling are reduced to a minimum and accidents are eliminated.

Pallet lifetimes are increased largely as they are less likely to become damaged when stored in a dispenser.

The area within which pallets are stored is also reduced considerably as the pallets are stacked upwards as opposed to next to each other in smaller stacks.

Using a dispenser also makes the operation much more hygienic as there is no physical contact between the operator and the pallet.

The Pneumatic Dispenser has the capacity to stack 15 pallets, or a total of 500kg, and it is capable of stacking and destacking one pallet at a time or the whole stack.

Available with guarding in order to support the pallets higher up once they have been stacked.

Bolts to fasten the dispenser to the floor are included for easy installation and an extended pallet for transportation.

Please do not hesitate to contact Packline for further information regarding this design on 01202 307700 or via our web site at www.packline.co.uk

Overview:-

- Pneumatic operated - 6bar
- Requires a 230v supply
- Lifting capacity of 15 pallets or 500kg
- Standard RAL colour 3020 Red
- Available with or without guarding to stack pallets which are either :
 - 1200mm x 800mm
 - 1200mm x 1000mm
- Optional extras include an overfill sensor, forklift protection barrier and availability in other RAL colours
