

AIRCRAFT WHEEL AND TYRE LIFTER

The clamp attachment is designed for the lifting, moving and rotating of Aircraft Wheels or Tyres. The attachment is fitted onto a 'Logitrans' fully powered stacker truck (SELF-R) with rotation facility.

The Aircraft Wheel Lifter can turn a tyre through 180 degrees for handling and transportation purposes.

This handling solution for handling large and heavy wheels or tyres can be adapted to the requirements of the individual customer.

Features:

Easy to set degree of tilt and rotation speed. Precise and controlled acceleration / deceleration on rotation at start / stop. Low maintenance costs – no relays and wearing parts.

Specifications:

Maximum Lifting Capacity: 250-300kg (551-661lbs), depending on diameter.

Maximum Diameter: 1500mm (59").

Maximum Lift height: dependent on diameter of wheels.
