PANTHER SILENT

Silent and smooth transportation of pallets.

Extremely silent and smooth movement due to special rubber wheels

Gentle to floor and flagstone layer - also with weight during transport

Very high user satisfaction and long operating life

Adjustable fork height / Rounded corners

Ergonomically correct handle

Less strokes to raise to full height (permanent quick lift pump)

Twin fork wheels to easily change direction

Tested with up to 46,000 pumps

Silent movement - tested to below 60 dBA

PRODUCT FEATURES

- ✓ Manual
- Electric
- Fully powered
- Inox
- Straddle legs
- Custom built

PANTHER MAXI

A fully powered pallet truck recommended for heavy pallet transport.
Focus on efficiency and safety for the operator.

Capacity of 1800 kg

Transport heavy
pallets safely with no
physical efforts

A compact
design and strong
construction -
100% steel

Possible to operate
with handle upright

Elegant design with
rounded corners to
protect surroundings
from damages

Slow acceleration
and very precise
movements due to the
control system

A short, electric pallet
truck manoeuvrable in
narrow areas

PRODUCT FEATURES

Pallet trucks product range

Panther, manual
Panther Silent, manual
Panther Inox, manual
Panther Maxi, fully powered

LogiQ (quarter pallet trucks), manual
Weighing scale pallet truck
Mover, lithium powered

HIGHLIFTER

With the highlifter you can lift up pallets from the floor to an ergonomically correct working position.

Can lift up to 1.500 kg
(dual stage cylinder)

Adjustable working height
(option for remote control)

Original highlifter
since 1980

Ergonomically correct
handle / Emergency
stop centrally placed

Foot protection in front
of steering wheels

Upgrade with level
control to ensure auto-
matic adjusted working
position for loading and
unloading of pallets

Double wheels in the front to increase stability
and prevent brake marks

Supporting feet at steering wheel

PRODUCT FEATURES

- ✓ Manual
- ✓ Electric
- Fully powered
- ✓ Inox
- Straddle legs
- ✓ Custom built
- ✓ Level control

LOGIFLEX

A very flexible solution to lift and transport different items on pallets.
With its compact design and ease of use the Logiflex stacker works well in narrow spaces.

Very solid construction to ensure long operating life

Compact design and easy to manoeuvre

Instant stop (forks stop quickly and precisely)

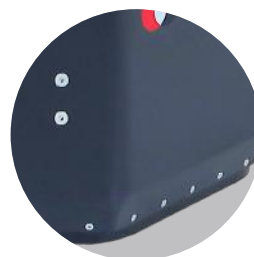

Internal charger and battery hour deck

Ergonomically correct handle with emergency stop

Foot protectors and shielded chains

Rear cover in metal to avoid breaking

PRODUCT FEATURES

- ✓ Manual
- ✓ Electric
- ✓ Fully powered
- ✓ Inox
- ✓ Straddle legs
- ✓ Custom built

- ✓ Level control

Optional extras

With the variable console, you can switch between different attachments:

Drum turner / Crane arm /
Platform / Boom / Drum forks / Different fork styles

ROTATOR

A professional solution to lift and rotate. The Rotator has two main purposes: To empty crates and boxes; and to improve the workplace ergonomics.

Rotate function 360°
(one adjustable stop in every side)

Low power consumption =
long battery life time

Intuitive screen to
preset rotation angles
and speed

Remote control for
lifting, lowering, and
rotation

Clamps and
box holders adapted to
individual needs

PRODUCT FEATURES

Manual

- ✓ Electric
- ✓ Fully powered
- ✓ Inox
- ✓ Straddle legs
- ✓ Custom built

REEL ROTATOR

Lift up heavy reels from a pallet, rotate and place in a packaging machine. The two main benefits of the reel rotator: Avoid manual material handling; ensure precise and careful handling of valuable reels.

Short overall measurements

Secured against opening by mistake

Handles reel diameters from Ø120 mm to Ø1270 mm

Foot protectors and shielded chains

Ergonomically correct handle

Remote control for electric clamping, lifting, lowering, and rotation

Intuitive screen to preset rotation angles and speed

PRODUCT FEATURES

- ✓ Manual
- ✓ Electric
- ✓ Fully powered
- Inox
- ✓ Straddle legs
- ✓ Custom built

MULTI DRUM TURNER

With the multi drum turner you can lift, turn, empty and transport various drums of all shapes and sizes. Two major advantages: it improves efficiency; and it reduces manual material handling.

Handles steel, plastic, small, low, high, square, round drums, from Ø300 mm to Ø600 mm

Ergonomically correct handle

Rotates 360 degrees (with 3 adjustable stops on each side)

Safety clamps

Available with or without straddle legs

Secured against opening by mistake (two-button-function)

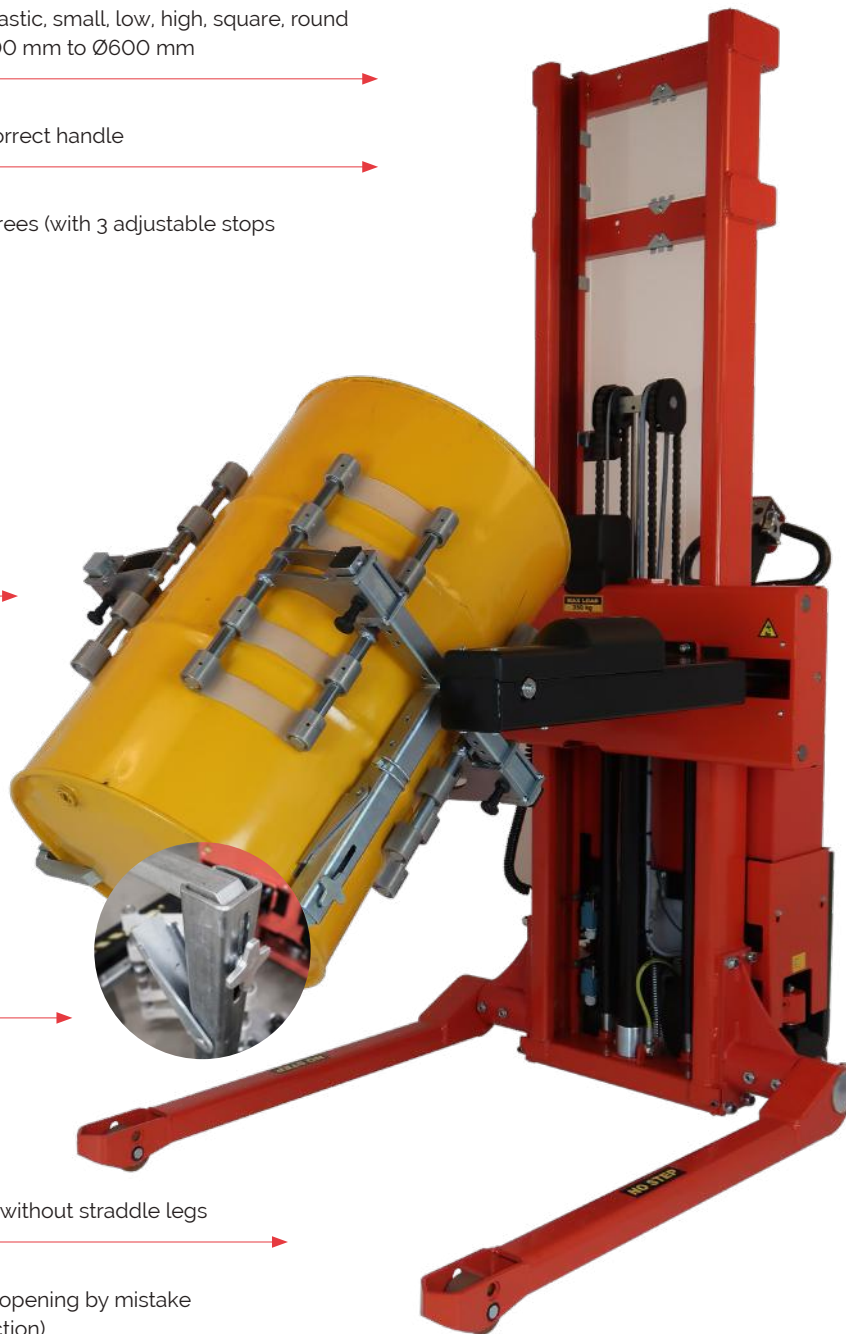

Specially developed polyurethane gripping pads

Remote control for electric clamping, lifting, lowering, and rotation

Intuitive screen to preset rotation angles and speed

PRODUCT FEATURES

Manual

- ✓ Electric
- ✓ Fully powered
- ✓ Inox
- ✓ Straddle legs
- ✓ Custom built

LOGITILT

With the Logitilt you enable easy access to the content of various containers and ensure a proper ergonomic work position.

Can be set to stop automatically in the same angle each time

Lifting height adjustable to individual requirements

Central location of control buttons and emergency stops

Ergonomically correct handle

Remote control for tilting and lifting

The handle can turn to the side to enable easy operator access

Pump unit with special oil for long durability

Assisted wheel steering on one wheel

PRODUCT FEATURES

- Manual
- ✓ Electric
- Fully powered
- ✓ Inox
- ✓ Straddle legs
- ✓ Custom built

STAINLESS STEEL

All our stainless steel products are designed for operation in high hygienic, wet or otherwise harsh environments. They are constructed of the best quality stainless steel and with focus on safe and efficient material handling.

Highest quality acid-resistant AISI 316L steel used for chassis

Closed design for easy cleaning and to avoid bacterial contamination (forks, "triangle")

Constructed specifically to meet high hygienic standards

White tandem wheels to protect the floor

Closed forks for easy cleaning

Waterproof stainless steel cover

Smooth electropolished surfaces

PRODUCT FEATURES

Products available as Inox / Inox Plus

Pallet trucks

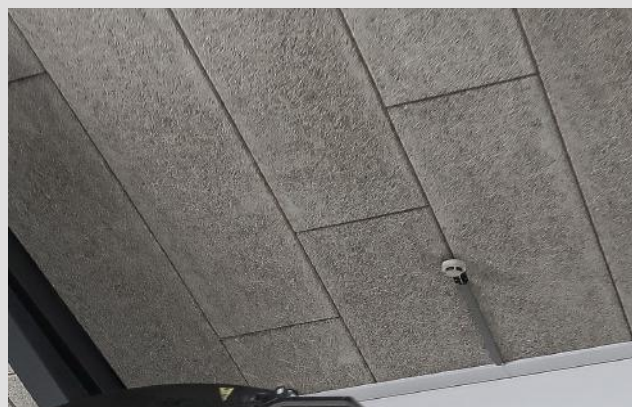

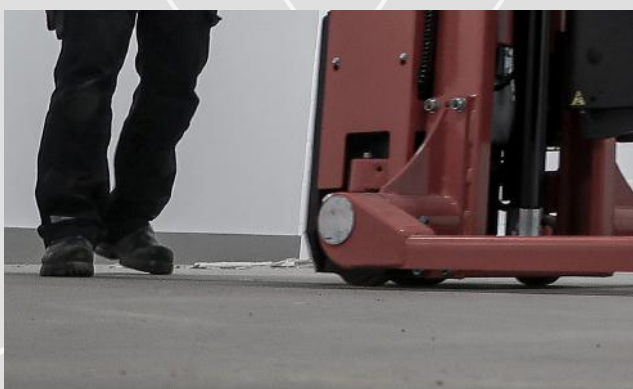

Highlifters

Logiflex stackers

Logitilt tilter

Rotator

Multi drum turner
