

# Barrel Lifting Clamp - Manual, Geared, or Motorised Rotation

## Safe, Controlled Handling for Barrels of All Sizes

Packline's stainless steel barrel clamp offers secure gripping and smooth 360° rotation, ideal for lifting, tipping, and positioning barrels across various industries.

## Rotation Options

Choose from manual, gearbox-assisted, or fully motorised rotation and tipping to suit your specific needs.

## KEY FEATURES:

- ✓ Torque-limited clamping to prevent over-tightening
- ✓ Optional electronic torque control for precision
- ✓ Custom nitrile grip pads protect delicate barrels
- ✓ Fully compatible with all Compac lifters via quick release system

## Versatile, Hygienic, and Efficient

Designed for cleanroom use and available with custom configurations to meet your unique handling requirements.
