

Bobbin Lifting Attachment

Versatile Handling for Bobbins and Reels Across Multiple Industries

Originally developed for copper wire bobbins, Packline's Bobbin Lifting Attachment is a flexible solution ideal for handling a wide range of materials, including textiles, film, foil, and cable.

Equipped with manual expanding arms or paddles, the attachment securely grips bobbins for safe and stable lifting. A battery-powered mechanism enables smooth lift/lower functions, operated via ergonomically placed controls with a slow start feature for precise positioning.

Engineered for safe, precise, and efficient bobbin handling across food, pharmaceutical, and manufacturing sectors.

KEY FEATURES:

- ✓ Hygienic stainless steel design ideal for cleanroom environments
- ✓ Secure manual clamping system for reliable bobbin holding
- ✓ Battery-powered lift with easy 'up/down' handlebar controls
- ✓ Full bespoke design service to match your application
- ✓ Quick-release system for easy tool change on Compac lifters
