

# Cargo-Lift Vacuum Lifting System

DS032026

## The Cargo-Lift Mobile Vacuum Lifting System for use with Pallet, Stacker & Forklift Trucks

The **Vac-Line Cargo-Lift Vacuum Lifting System** from Packline Ltd is a powerful, mobile vacuum lifting solution enabling quick loading and unloading of items. This Vacuum Lifting System is designed to work with pallet, stacker and forklift trucks leading to a highly efficient vacuum handling system. Engineered for safe, ergonomic and efficient load handling, the Cargo-Lift improves productivity across warehouses, manufacturing facilities, logistics centres and distribution operations.

The system is easily transportable via pallet, stacker or forklift trucks to the desired area, ready to work within seconds. An electric height adjustable arm facilitates loading and unloading within restricted height access areas as well as improving ease of transportation. The fork pocket design allows effortless mounting and demounting of the Cargo-Lift enabling the operator to remain at the driving position the lift truck improving efficiency and workflows.

- ✓ Vacuum lifting System for Pallet, Stacker and Forklift Trucks
- ✓ Mobile vacuum lifting solution
- ✓ Fork pocket design allows effortless mounting and removal
- ✓ Engineered for safe, ergonomic and efficient load handling
- ✓ Mobile vacuum lifting solution – no fixed crane or gantry required
- ✓ Electric height adjustable arm facilitates loading and unloading within restricted height access areas
- ✓ 180° working area for flexible load positioning
- ✓ Lifting Capacity: 80 kg
- ✓ Lifting Height: Up to 1,500 mm from pallet level
- ✓ Suitable for boxes, cartons, sacks, bags and sealed loads
