

Drum Clamp Attachment - Geared Rotation

Manual Precision for Safe, Versatile Drum Handling

Designed for controlled lifting and 360° rotation, this attachment securely grips a wide range of drum types for filling, emptying, or repositioning tasks.

Dual Handwheel Operation

One handwheel clamps the drum with a torque-limited grip; the other provides smooth, accurate manual rotation between vertical and horizontal orientations.

Flexible & Hygienic

Durable stainless-steel construction makes it ideal for clean room, food, chemical, and pharma environments.

Quick-Change & Customisable

Fully interchangeable with Compac Lifters via quick release, and available with bespoke design options to suit specific handling needs.
