

Mobile Hopper – Efficient Material Handling and Controlled Ingredient Transfer

Efficient Transfer of Raw Ingredients in Hygienic Environments

Packline's Compac Mobile Hopper offers a robust, stainless-steel solution for the safe and controlled transfer of bulk materials in medical, dairy, chemical, and pharmaceutical settings.

Featuring a rotating hopper attachment, the unit easily shifts from horizontal (loading) to vertical (unloading) positions using a manual gearbox with hand-wheel—or an optional motorised system for added precision. The powered lift function allows smooth height adjustment at the push of a button, enhancing operator safety and process efficiency.

Streamline your material transfer process with the Mobile Hopper—designed for safety, efficiency, and cleanroom performance.

KEY FEATURES:

- ✓ Hygienic stainless-steel construction for high-care industries
- ✓ Manual or motorised hopper rotation for flexible handling
- ✓ Remote controlled electric lift for safe, accurate height control
- ✓ Fully bespoke designs tailored to your process needs
- ✓ Quick-release system for interchangeable attachments
