Reel Lifting Frames

Efficient Handling of Long Reels
Engineered for long reels of film and material, this open-frame design allows easy loading, secure transport, and smooth unloading—ideal for modern production lines.

Optimised for Large Reels
Perfect for applications requiring frequent handling of oversized reels, including stretch wrapping systems like the Octopus Line Spin Wrap.

Single-Operator Operation
Transforms a two-person task into a safe, efficient, single-operator process—reducing manual handling and boosting productivity for cost-effective, multi-purpose use.
