

Overhead Cradle Attachment

Precision Handling for Horizontal Rolls

Developed for the food industry, this attachment lifts rolls horizontally from pallets using a mandrel, then rotates them 90° for accurate placement onto processing equipment.

Powered & Adjustable

Powered rotation and electric lift/lower functions ensure smooth, strain-free handling. Manually adjustable cradle arms accommodate various roll sizes.

Hygienic & Customisable

Constructed for clean room use, it's durable, hygienic, and fully customisable through our bespoke design service.

Quick-Change Compatibility

Interchangeable via our quick release system, it integrates easily with all Compac Lifters for maximum versatility.
