

Twin Spindle Attachment - Reel Handling by Diameter

The Twin Spindle Attachment provides a safe, simple method for lifting reels via their outer diameter—ideal for hygienic environments like food, pharmaceutical, and medical production.

Made from high-grade stainless steel, it offers secure handling and easy transport, with options to suit various reel sizes.

Fully compatible with all Packline Compac lifters via the quick-release system for fast, flexible operation.

KEY FEATURES:

- ✓ Lifts reels by outer diameter for stable handling
- ✓ Available in multiple sizes with custom options
- ✓ Hygienic stainless-steel construction for cleanroom use
- ✓ Quick-release compatible with all Compac models
