

Vertical Spindle Attachment - Manual Rotation

The Manual Vertical Spindle Attachment is a simple, reliable solution for lifting and rotating reels or film rolls. It grips securely through the core and allows for smooth 180° manual rotation using ergonomic handles for safe and controlled operation.

With a 300kg capacity and a range of standard sizes, it's ideal for everyday handling tasks. Custom designs are available for specialised applications.

Fully compatible with all Packline Compac lifters, the quick-release system ensures fast, flexible attachment changes.

KEY FEATURES:
