

# Swing Jib Crane Vacuum Lifter

## Versatile, Cost-Effective Lifting for Diverse Applications

The Swing Jib Crane Vacuum Lifter is a reliable, entry-level solution for material handling across a wide range of industries. Designed for ease of installation and use, this system offers exceptional value and flexibility—ideal for lifting applications involving boxes, panels, stone slabs, plastic sheets, and more.

## KEY FEATURES:

- ✓ **Flexible Mounting Options:** The Swing Jib system features a vertical column that can be mounted to the floor, ceiling, wall, or a mobile counterbalance base plate—providing maximum versatility across different operational set-ups.
- ✓ **Arm Rotation & Reach:** The jib arm allows for 270 degrees of rotation, delivering a generous working range. Standard arm lengths up to 8 metres (26.25 feet) are available to accommodate large work areas and wide load spans.
- ✓ **Material Options:** Constructed from painted mild steel as standard, with 304 or 316 stainless steel options for cleanroom, food, or pharmaceutical environments.
- ✓ **Vacuum or Hoist Integration:** The system is designed to support either a vacuum lifting kit or electric hoist, making it adaptable for different types of loads and handling processes.
- ✓ **Mobile Deployment:** When mounted to the optional counterbalance base plate, the unit can be relocated via forklift to multiple locations across the site—ideal for dynamic production or warehouse environments.

## APPLICATIONS:

Suitable for use in manufacturing, logistics, packaging, construction, and more—this swing jib system handles loads ranging from cardboard cartons to slabs of stone with ease and control.
