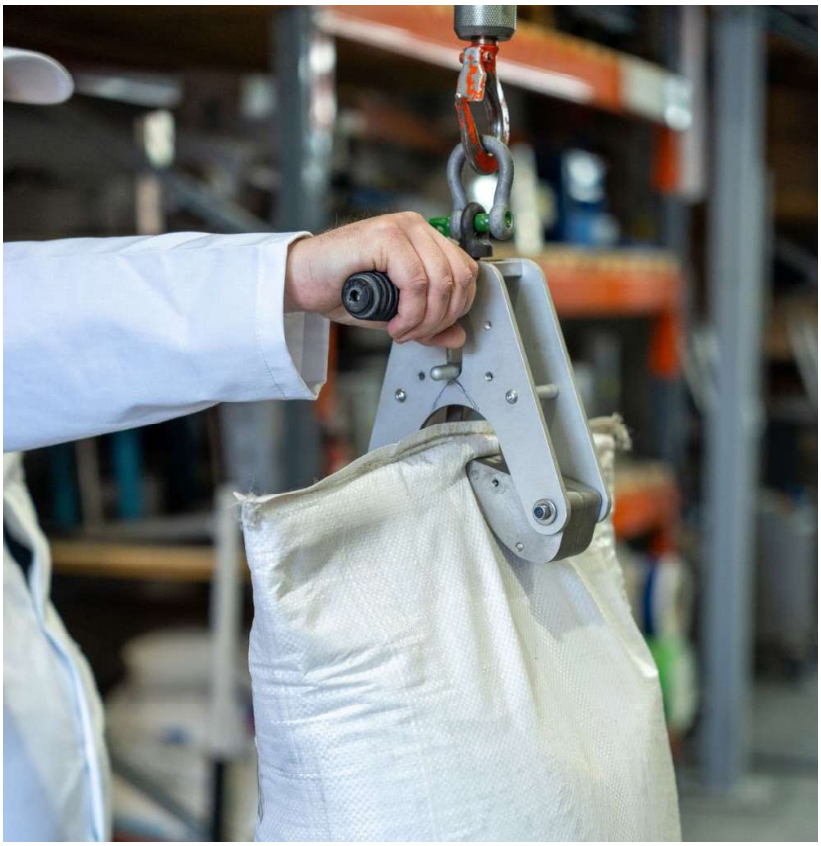
Lifting Systems for Hessian & Woven Sacks

Flexible, Safe Handling for Warehouses, Cleanrooms & On-Site Operations
Packline's lifting systems for hessian or woven sacks provide an ergonomic, efficient solution for handling bulky or heavy sack loads in a variety of environments—including warehouses, cleanrooms, and outdoor sites.

Equipped with a secure clamp attachment, these lifters ensure a firm grip and safe, weightless lifting of sacks up to 75kg. The design allows for smooth, controlled handling, reducing strain and improving productivity.

KEY FEATURES:

- ✔ Secure clamp attachment for hessian and woven sacks containers
- ✔ Lifts up to 75kg with minimal operator effort
- ✔ Suitable for indoor and outdoor use across multiple industries
- ✔ Customisable in lift height, reach, construction, and finish
- ✔ A range of configurations tailored to your specific sack handling needs


Improve efficiency and safety in your sack handling processes with a lifting solution built around your work flow.
