

Sack Lifting and Splitting

Efficient and Hygienic Sack Handling for Bulk Ingredient Transfer

Packline's Vacuum Sack Lifter is designed to effortlessly lift, split, and empty sacks or bags of raw materials without losing suction—making it ideal for production and mixing areas in industries such as food, pharmaceutical, and chemical processing.

This innovative system allows operators to lift a wide range of sacks and pour contents directly into hoppers, streamlining material transfer while maintaining hygiene and safety.

KEY FEATURES:

- ✓ **Maintained Vacuum Suction** – Split and empty sacks without breaking suction
- ✓ **Hygienic Construction** – Available in stainless steel 304 or 316 for cleanroom environments
- ✓ **Flexible Mounting Options** – Mount to floor, wall, ceiling, or mobile counterbalance base
- ✓ **Portable Design** – Forklift-compatible base plate enables site-wide mobility
- ✓ **Extended Reach** – 2.5m swing arm with 360° rotation offers up to 5m working diameter

Enhance productivity and safety with a reliable vacuum solution tailored for high-care material handling.
