Omni-Boom Attachment - Multi-Directional Rollers & In-Place Rotation

The Omni-Boom Attachment offers a smart, efficient solution for transferring, unwinding, and cutting reel material directly on the boom—boosting productivity and reducing manual effort.

Its multi-directional rollers enable smooth reel transfer, while in-place rotation allows operators to cut and unwind film without removing the reel. A built-in safety stop-pin keeps reels secure during operation.

Ideal for packaging and production environments, the Omni-Boom enhances safety, efficiency, and work flow control.

KEY FEATURES:

- ✔ Core-supported reel lifting for safe transport
- ✔ Simple, durable, and low-maintenance designed
- ✔ Hygienic stainless-steel construction
- ✔ Quick-release compatibility with all Compac models
