

Clamping Vertical Spindle

Safe Handling of Telescoping Reels

Designed for reels prone to telescoping, this attachment provides secure clamping and controlled lifting in both vertical and horizontal orientations.

Compact & Powerful

Ideal for tight spaces, with powered or geared clamping and rotation to reduce manual handling and enhance operator safety.

Stable & Hygienic

Fitted with nitrile pads and a core grip for extra stability. Stainless steel construction ensures durability and suitability for clean room environments.

Flexible & Customisable

Supports up to 200kg and is fully interchangeable with Compac Lifters. Bespoke options available to meet specific handling needs.
