

Vacuum Lifting Systems for Buckets, Tubs & Containers

Ergonomic, Efficient Handling for Cleanroom and Warehouse Applications

Packline's vacuum lifters offer a reliable and user-friendly solution for lifting plastic buckets, tubs, and containers across a range of industries. Whether transferring containers from pallets to storage or feeding materials into processing equipment, these systems ensure smooth, weightless movement with minimal strain on operators.

With a lift capacity of up to 100kg, the vacuum lifter enhances workplace safety and productivity through effortless and precise handling.

KEY FEATURES:

- ✓ Ideal for cleanroom and warehouse environments
- ✓ Handles plastic buckets, tubs, and containers up to 100kg
- ✓ Customisable lift capacity, reach, and construction materials
- ✓ Optional hook with solo handle for lifting handled containers
- ✓ Wide range of configurations tailored to your operational needs

Streamline your material handling with Packline's vacuum lifting solutions—designed for speed, safety, and flexibility.
