

# Drum Cage - Handling Tapered Drums

DS/062021

The Stainless Steel Drum Handling Cage from Packline is a hygienic and efficient solution for lifting, rotating, and emptying tapered drums in the food, pharmaceutical, and cleanroom industries.

Designed for maximum safety, the cage system securely encloses the full length of the drum, ensuring a firm grip while allowing controlled emptying of ingredients. Vertical and horizontal supports stabilise the drum during the rotation process.

This drum handling attachment features electric lift with manual geared rotation, operated via a handwheel for smooth and precise movement between vertical and horizontal positions. An adjustable front clasp provides extra security, accommodating tapered drums with diameters of 500–600mm.

## Key benefits:

- ✓ Safe and secure drum handling with a fully enclosed stainless steel cage.
- ✓ Easy manual rotation using the geared handwheel system.
- ✓ Adjustable design suitable for varying drum sizes.
- ✓ Quick-release compatibility with all Packline 'Compac' Lifting Machines.
- ✓ Hygienic stainless steel construction, ideal for food and pharmaceutical environments.

## Technical Specifications:

- ✓ Lifting Capacity: 250kg (551lbs) – higher capacities available on request.
- ✓ Drum Diameter: 500–600mm tapered drums (19.7–23.6 inches).

This bespoke drum lifting cage is easy to operate, safe to use, and designed to meet strict hygiene standards.
