

Handling Multi-Diameter Reels

DS/092024

Packline's Multi-Diameter Roll Handling Clamp is a versatile lifting solution designed to safely handle a wide range of roll sizes in demanding environments such as the food processing and packaging industry.

Flexible Roll Handling for Varying Core Sizes

Unlike standard roll clamps with a limited range, this specialist attachment features removable and additional clamp pads, enabling operators to handle rolls from 100mm up to 700mm in diameter – a 600mm range compared to the usual 35mm. This makes it the ideal choice for production facilities where roll sizes vary frequently.

Key Features

- ✓ Wide Diameter Range – Safely lifts rolls from 100mm to 700mm core diameters.
- ✓ Heavy-Duty Capacity – Standard lift capacity of 225kg, with custom options available.
- ✓ Secure Grip – Clamp arms are fitted with removable padded nitrile rubber to ensure strong, non-damaging grip on different roll materials.
- ✓ Quick-release plunger for removing clamping rollers when handling larger diameter reels.
- ✓ Customisable Design – Additional pads can be fitted or removed quickly to suit changing production requirements.
- ✓ Hygienic & Safe – Manufactured in stainless steel, making it ideal for food, pharmaceutical, and cleanroom applications.
- ✓ Provides a single lifting attachment that can cater for multiple roll sizes.
- ✓ Improves efficiency when handling rolls across different production lines.
