

Overhead Reel Clamp Attachment

DS14785/062025

The Overhead Clamp Attachment from Packline is a specialist solution designed to lift reels safely and efficiently from pallets onto processing lines. This bespoke reel handling attachment allows reels to be lifted securely from above, keeping the reel core accessible for mandrel insertion and downstream operations.

This reel lifting solution is particularly effective for handling reels delivered two per pallet in a horizontal arrangement, overcoming the challenges of lifting large, heavy reels in confined spaces.

Technical Specifications

- ✓ Material: High-grade stainless steel (hygienic and clean room compliant)
- ✓ Reel Core Sizes Supported: 3" (76 mm) or 6" (152 mm)
- ✓ Maximum Load Capacity: 300 kg
- ✓ Attachment Type: Overhead Clamp Attachment
- ✓ Attachments: Fully interchangeable with Packline lifting equipment

Key Features

- ✓ Precision Geared Clamping Mechanism – Operated by a handwheel for secure and accurate engagement with the reel's outer diameter (motorised option available)
- ✓ Electric Lift with Remote Control – Provides smooth, safe, and effortless lifting and lowering.
- ✓ By gripping the reel securely by its outer diameter, the attachment ensures the reel can be lifted directly from the pallet, leaving the core free for immediate use on the processing line.
