

# Overhead Suspended Single Spindle

DS15037/082025

Packline's **Overhead Roll Handling Spindle Attachment** is a safe and efficient solution for lifting and transporting heavy reels or paper rolls directly from above. Designed for use with an **overhead crane system or forklift truck**, this vertical spindle attachment allows operators to lift rolls securely, move them with ease, and position them precisely where required.

## Key Features of the Overhead Spindle Attachment

- ✓ **Versatile Mounting** – Supplied with a 6" spindle (also available in 3"), complete with a durable **eyebolt fitting** for quick attachment to a crane or forklift.
- ✓ **Secure Reel Grip** – Expanding teeth on the vertical spindle lock firmly into the reel's core. This gripping mechanism is controlled by a simple **manual handwheel**, ensuring safe and stable handling.
- ✓ **Heavy-Duty Performance** – Standard lift capacity of **200kg**, with higher capacities available on request.

## Suitable Applications

The overhead roll lifting spindle is ideal for handling:

- ✓ Paper roll stock and heavy reels
- ✓ Reels vertically stacked on pallets
- ✓ Applications requiring safe reel transfer between pallets, storage, or production lines

## Technical Specifications

- ✓ Roll Height: up to **1250mm**
- ✓ Roll Diameter: up to **800mm**
- ✓ Lift Capacity: **200kg** (custom options available)
- ✓ Internal Reel Core Diameter: **150mm**
